

## INTERNET PLUS MDDOS

# PROTECT REVENUES AND MINIMISE COSTLY DOWNTIME: 24/7/365

## INTEGRATING INTERNET WITH SECURITY TO DELIVER PEACE OF MIND ROUND THE CLOCK

The world of business is cut and thrust - so you can't afford to give your competition the edge. With major cyber attacks continuing to be big news and increasing year on year, the consequences of your site going down could be catastrophic.

Unplanned outages mean missed orders, not to mention potential customer data compromises — all of which can undermine trust to severely damage your brand reputation long term. That's why protecting your site's infrastructure is the best way to keep your business safe and customer confidence high. And with Tata Communications' powerful bundled solution of Internet Plus MDDoS mitigation services, you can meet today's cyber challenges head on.

- **Benefit from a more secure internet experience** — with superfast access through our global Tier-1 internet backbone and DDoS mitigation via worldwide scrubbing farms minimising latency impact.
- **Achieve greater operational efficiency** — through a unique blend of services that solves your security challenges and meets network needs with one robust, single provider solution
- **Deliver a superior customer experience** — by preventing disruption to your online business with applications that remain accessible and effective, even during an attack
- **Maintain peace of mind** — knowing you can depend on a global service provider with immense infrastructure, expertise and alliances

## DELIVER AVAILABILITY WITH ALWAYS-ON PROTECTION

Today's customers face an almost unlimited choice online. So establishing yourself as a trusted presence in the marketplace is all the more critical.

However, attacks can last for days and it can take businesses months to recover. The downtime is damaging to your reputation and can cost you customers you've fought hard to win. The fact is that customers expect access to your site 24/7/365 and, if they can't get it, they'll simply move on.

Tata Communications' bundled Internet access with MDDoS offers you the most direct, efficient and secure route across the internet. We constantly monitor our internet-facing infrastructure to detect potential attacks in real time. And it means that in the event of an incident or potential threat, our Tier-1 network helps divert even large-scale attacks to the nearest of our 17 global scrubbing farms. They discard malicious traffic and redirect legitimate to its original destination—so neither you nor your customers experience disruption.

### Enhance your online reputation

We deliver all our internet access and DDoS mitigation as a single service. And thanks to our global network, it's fast and scalable to suit your needs. Your customers will enjoy a more confident eCommerce experience—trusting your business with their data and their money. And with the reassurance of a security solution that's 'always on', you're free to concentrate on delivering the service your customers expect.

- With over 35% of the world's internet routes on our network, we're one of the largest cloud-based DDoS mitigation and scrubbing services on the planet
- We're one of the only global ISPs offering a carrier grade bundled service, dedicated to helping your business perform at its best
- We deliver proactive, round-the-clock monitoring for our customers worldwide—and we're trusted by a number of global organisations
- We're an industry leader: the number one international voice carrier and submarine cable owner, the fastest growing Tier-1 operator and a top five IP transit provider
