TATA COMMUNICATIONS

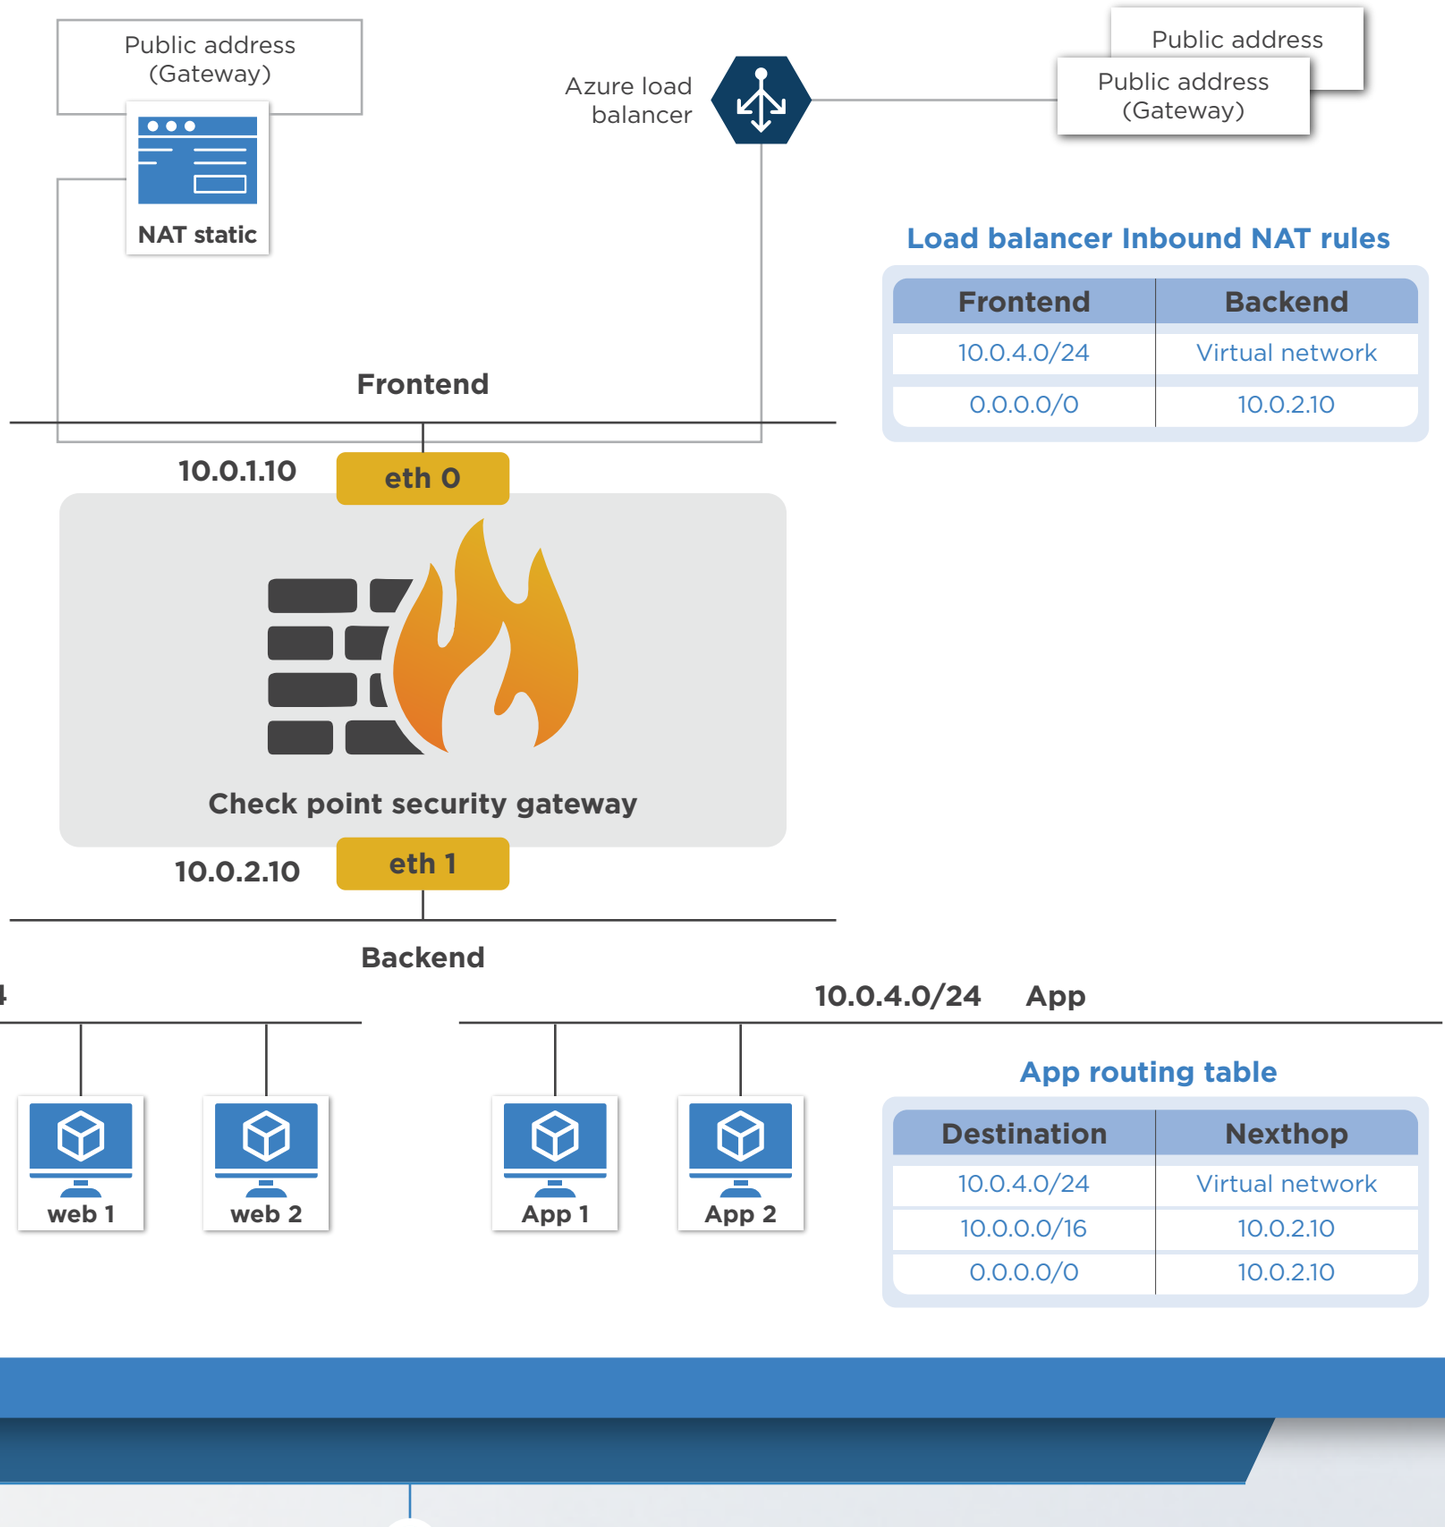
MAKE YOUR CLOUD WORKLOAD SECURE

Monitor and inspect all traffic coming to and from your web applications to keep your workload safe



Frontend routing table

Destination	Nexthop
10.0.1.0/24	Virtual network
10.0.0.0/16	10.0.1.10
0.0.0.0/0	Internat (system)

Load balancer Inbound NAT rules

Frontend	Backend
10.0.4.0/24	Virtual network
0.0.0.0/0	10.0.2.10

Web routing table

Destination	Nexthop
10.0.3.0/24	Virtual network
10.0.0.0/16	10.0.2.10
0.0.0.0/0	10.0.2.10

App routing table

Destination	Nexthop
10.0.4.0/24	Virtual network
10.0.0.0/16	10.0.2.10
0.0.0.0/0	10.0.2.10

Roaming users can still have access to data and apps through your virtual private network

Add advanced protection such as firewalls and antivirus solutions to prevent breaches, malware and attacks in the public cloud

Create unified security management across the entire hybrid cloud environment
