Dear Sir / Madam,

Sub: Intimation of Credit Ratings under the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015

Pursuant to Regulation 30 read with Part B of Schedule III and Regulation 51 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations 2015, as amended, we wish to inform you that CRISIL Ratings Limited ('CRISIL'), the credit rating agency, has assigned the rating of 'Crisil AAA/Stable' to Non-convertible Debentures of ₹1,000 crores proposed to be issued by the Company and has reaffirmed its 'CRISIL A1+' rating on the Company's commercial paper programme.

The intimation dated July 30, 2025 for affirmation and assignment of ratings received from CRISIL is enclosed for your reference.

Kindly take the same on your records.

Thanking you,

Yours faithfully,
For Tata Communications Limited

Zubin Adil Patel
Company Secretary and Compliance Officer

Encl: as above

Rating Rationale

July 30, 2025 | Mumbai

Tata Communications Limited

'Crisil AAA/Stable' assigned to Non Convertible Debentures

Rating Action

Rs.1000 Crore Non Convertible Debentures	Crisil AAA/Stable (Assigned)
Rs.1800 Crore Commercial Paper	Crisil A1+ (Reaffirmed)

Note: None of the Directors on Crisil Ratings Limited's Board are members of rating committee and thus do not participate in discussion or assignment of any ratings. The Board of Directors also does not discuss any ratings at its meetings.

1 crore = 10 million

Refer to Annexure for Details of Instruments & Bank Facilities

Detailed Rationale

Crisil Ratings has assigned its '**Crisil AAA/Stable**' rating to Rs 1,000 crore non convertible debentures of Tata Communications Limited (TCL) while reaffirming its 'Crisil A1+' rating on the commercial paper programme. The rating factors in TCL's strong market position, its diversified and healthy business risk profile, robust financial risk profile aided by strong cash accrual and healthy liquidity, and enhanced financial flexibility arising from the ultimate parent, Tata Sons Pvt Ltd (Tata Sons; 'Crisil AAA/Stable/Crisil A1+'). These strengths are partially offset by the large capital expenditure (capex) requirement and susceptibility to regulatory and technological changes.

The business risk profile factors in the TCL's established position in telecom infrastructure segment with TCL owning the world's largest fibre network and connecting most telecom companies and cloud giants. Further, its diversified digital business provides solutions across the verticals including cloud platform, digital collaboration, security services etc. With data being the primary growth driver, TCL is likely to see healthy growth in Data segment through both organic and inorganic means over near to medium term.

Operating revenue grew ~10% year-on-year to ~Rs 23,197 crore in fiscal 2025 from Rs 21,204 crore in Fiscal 2024, the growth was driven by the data segment, which has grown from Rs 17,161 crore in Fiscal 2024 to Rs 19,513 core in Fiscal 2025 representing growth of 13.7%. This revenue growth was supported by the full year contribution from Kaleyra Inc acquired during fiscal 2024. The data segment is expected to grow at a healthy pace in medium term. Operating margins remained largely stable at ~20% in fiscal 2025 compared to ~20.4% in fiscal 2024. The acquisitions done during fiscal 2024 primarily in Data segment continues to remain margin dilutive at present on account of integration costs. Operating margin is expected to remain healthy and improve over the medium term, owing to synergies arising from acquisitions. That said, TCL is exposed to risks related to integration of large acquisitions.

The financial risk profile improved in fiscal 2025 with net leverage (net debt/operating EBITDA) reducing to 2.3 times compared to 2.5 times in fiscal 2024 on back of strong cash accruals. Crisil Ratings expects the leverage to gradually reduce in medium term owing to revenue growth and enhanced profitability. TCL plans capex of Rs ~ 3,500 crore annually over the medium term, including for acquisitions with focus on new-age technology solutions providers and maintenance capex for undersea cables. The capex is expected to be funded through a prudent mix of internal accrual and debt such that the net debt to Ebitda (earnings before interest, tax, depreciation and amortisation) ratio remains stable and gradually reduce to below 2.0 times in medium term

Crisil Ratings has taken note of the potential liability on TCL, with respect to the adjusted gross revenue (AGR) dues. While TCL believes it has a case to defend, it made a payment of Rs 379.5 crore to the Department of Telecommunications (DoT) under protest in fiscal 2021. The company also reported Rs 9,896 crore as contingent liabilities during the year ended March 2025, with respect to the AGR dues related to its national long distance and international long-distance licenses, for which appeals are pending and remain sub judice. Furthermore, on March 31, 2021, DoT issued a notification to amend the internet service provider (ISP) licenses granted in 2002 and 2007. This amendment was challenged in the Telecom Disputes Settlement and Appellate Tribunal by two ISPs, and an interim stay was granted to all similarly placed license holders. Crisil Ratings will continue to monitor the developments around these sub judice matters and any material deviation in the total liabilities of TCL will be a key rating sensitivity factor.

Analytical Approach

Crisil Ratings has combined the business and financial risk profiles of TCL and its operating subsidiaries and associates. Crisil Ratings has applied its parent notch-up framework to factor in the extent of support available to TCL from its ultimate parent, Tata Sons.

Please refer Annexure - List of Entities Consolidated, which captures the list of entities considered and their analytical treatment of consolidation.

Key Rating Drivers & Detailed Description

Strengths:

- **Strong market position with global presence and diversified business profile:** TCL owns the world's largest submarine fibre network — more than 500,000 kilometre (km) of subsea fibre — and more than 210,000 km of terrestrial fibre. Over 70% of the world's telecommunication (telecom) companies use the networks of TCL to bring their mobile services to customers. Around 80% cloud giants are connected to their businesses through TCL and over 25% of the global internet routes are on the networks of the company.

The operations of TCL are diversified across the data business, and include cloud, digital collaboration and security services, apart from the core connectivity services. TCL, being an integrated solutions provider and with its strategic shift to being a platform-based service provider, is believed to have no direct end-to-end competitor in India or overseas. TCL has an established network, with unutilised data traffic carrying capacity, which will help the company face any competitive pressures as demand for the cables is expected to increase.

- **Healthy operating performance, largely aided by data business:** Revenue increased by ~10% year-on-year to ~Rs 23,197 crore in fiscal 2025, the growth was driven by the data segment, which has grown from Rs 17,161 crore in Fiscal 2024 to Rs 19,513 crore in Fiscal 2025 representing growth of 13.7%. The Ebitda from data segment stand at Rs 3652 crore (18.7% margin) crore for FY 2025. The share of the data business has increased significantly over the years and was ~84% of total revenue and ~79% of the consolidated Ebitda in fiscal 2025. The contribution from voice segment has reduced over the years, during fiscal 2025 voice segment has generated Rs 1,633 crore revenue and an EBITDA of Rs 383 crore (23% margin).

Operating margin is expected remain healthy and improve over the medium term, owing to synergies arising from acquisitions. That said, TCL is exposed to risks related to integration of large acquisitions.

- **Healthy and improving financial risk profile:** The financial risk profile is backed by healthy cash accrual, significant liquidity and comfortable debt protection metrics. The financial risk profile continues to remain healthy with net leverage reducing to 2.3 times as on March 31, 2025, compared to 2.5 times at the end of fiscal 2024. Interest coverage ratio stand at 6.4 times in fiscal 2025 compared to ~7 times in fiscal 2024. Despite the expected high capital intensity over the medium term, the net debt to Ebitda ratio should remain below 2 times in medium term, supported by continued healthy cash accrual. The interest coverage ratio should remain healthy, too, at 8-10 times over the medium term. Any sizeable, debt-funded acquisition or capex impacting the financial risk profile will remain a key rating sensitivity factor.
- **Strong linkages with Tata Sons and healthy financial flexibility:** Shareholding of Panatone Finvest Ltd (Panatone; 'Crisil AAA/Stable/Crisil A1+') in TCL stands at 44.80% while Tata Sons holds 14.07%. Panatone is a wholly owned subsidiary of Tata Sons. Thus, Tata Sons is the ultimate promoter/parent entity of TCL with its total shareholding in the company at 58.86%. With Tata Sons parentage, TCL enjoys strong financial flexibility of TCL with ability to raise money at very competitive rates.

Moreover, Tata Sons holds management control in TCL and views TCL as an integral part of its telecom strategy. Given the healthy cash accrual expected over the medium term, no major support will be required by TCL from Tata Sons. Nevertheless, TCL will continue to receive need-based support from Tata Sons.

Weaknesses:

- **Capital-intensive operations:** The core assets of TCL — under-sea cables — require huge capex for layout and replacement or upgrade at the end of life. This requires continuous maintenance and monitoring as the cables are susceptible to damage that may result in connectivity loss till repair. This risk may persist though it is mitigated by availability of alternative cables for most locations.

Over the next few years, other than maintenance capex and periodic upgrade including laying of fresh cables, the company plans to step up capex for incubation/growth businesses with focus on new age technology solutions providers. Larger-than-expected capex impacting the company's financial risk profile will remain monitorable.

- **Exposure to regulatory and technological risks:** Regulatory and policy changes have played a central role in defining the risk characteristics of the telecom sector in India. The sector is extremely dynamic structurally, and therefore, the risks pertaining to regulatory intervention will persist. Moreover, presence in multiple geographies exposes TCL to international regulatory risks. The telecom sector remains susceptible to technological changes too as newer technologies could necessitate sizeable fresh investments or overhaul of the current networks.

Liquidity: Superior

Liquidity was supported by cash and liquid investments of ~Rs 1,177 crore and unutilised fund-based limit of ~Rs 3,938 crore as on June 30, 2025. Net cash accrual, expected at Rs 4,000-4,500 crore per annum, will be more than sufficient to cover yearly interest and amortising principal obligations over the medium term. Strong parentage and strong financial risk profile should help the company refinance at favourable terms.

Outlook: Stable

Tata communications should maintain a comfortable business risk profile, supported by its healthy market position and strong cash accrual.

Crisil Ratings also factored the potential benefits for TCL owing to strong linkages it holds with the parent Tata Sons.

Environment, social and governance (ESG) profile

Crisil Ratings believes the ESG profile of TCL supports its already strong credit risk profile.

The telecom sector has an impact on the environment because of the electricity requirement for network infrastructure with increasing data consumption. Telecom companies are also exposed to regulatory and operational risks involved in handling data. Moreover, the systemic importance of telecom services to society and the economy underscores the importance of resilient and accessible network to the widest number of users. TCL has continuously focused on mitigating its environmental and social risks.

ESG highlights

- The company has undertaken various sustainability initiatives and set targets to optimise its performance on various environmental and social key performance indicators
- TCL has set a target to achieve net zero by 2035 and carbon neutrality by fiscal 2030.
- Additionally, it plans to reduce 20% water consumption by fiscal 2030, against fiscal 2020 baseline. It also has target of zero waste to landfill by fiscal 2027.
- On the social front, TCL targets to ensure diversity to 27.5% by fiscal 2026.
- TCL governance structure is characterized by 63% independent directors on its board.

Rating sensitivity factors

Downward factors

- Decline in revenue and operating profitability and any significant debt funded acquisition leading to net leverage sustaining above 2.5x.
- Weakening linkages with parent or downgrade in parent's rating by 1 or more notches.

About the Company

Incorporated in 1986, TCL is a leading global communications company that offers voice, data and value-added services to enterprises, carriers and retail consumers. It is among the world's largest providers of wholesale international voice services and operates one of the biggest global submarine cable networks.

About Crisil Ratings Limited (A subsidiary of Crisil Limited, an S&P Global Company)

Crisil Ratings pioneered the concept of credit rating in India in 1987. With a tradition of independence, analytical rigour and innovation, we set the standards in the credit rating business. We rate the entire range of debt instruments, such as bank loans, certificates of deposit, commercial paper, non-convertible/convertible/partially convertible bonds and debentures, perpetual bonds, bank hybrid capital instruments, asset-backed and mortgage-backed securities, partial guarantees and other structured debt instruments. We have rated over 33,000 large and mid-scale corporates and financial institutions. We have also instituted several innovations in India in the rating business, including ratings for municipal bonds, partially guaranteed instruments and infrastructure investment trusts (InvITs).

Crisil Ratings Limited ('Crisil Ratings') is a wholly-owned subsidiary of Crisil Limited ('Crisil'). Crisil Ratings Limited is registered in India as a credit rating agency with the Securities and Exchange Board of India ("SEBI").
