

JAMVEE FOR MICROSOFT TEAMS AND MICROSOFT 365 DESKTOP

SEAMLESS COLLABORATION FROM A SINGLE APP

JAMVEE now seamlessly integrates and operates within Microsoft Teams and Microsoft 365. It can also function as a pop-out standalone application within those platforms. Additionally, JAMVEE can directly work in your web browser. With this integration, there's no more need to switch between applications—everything you need is right at your fingertips!

Key features:

WEBRTC and JAMVEE within Microsoft Teams: Utilise the pop out feature in your preferred environment, whether it's directly in the browser or within Microsoft Teams.

No additional PSTN calling license required: Experience hassle-free calling without the need for extra licenses.

Secure login: Protect your account with two-factor authentication (2FA), using your registered email ID and a one-time password for enhanced security.

Intuitive uniform UI: Navigate with ease across all platforms — Microsoft Teams, WEBRTC, and desktop applications for both Windows and MAC.

JAMVEE Presence: Stay updated with your contacts' availability with real-time online, offline, and busy status indicators.

Contact management: Add contacts effortlessly from the main screen, providing flexibility and convenience.

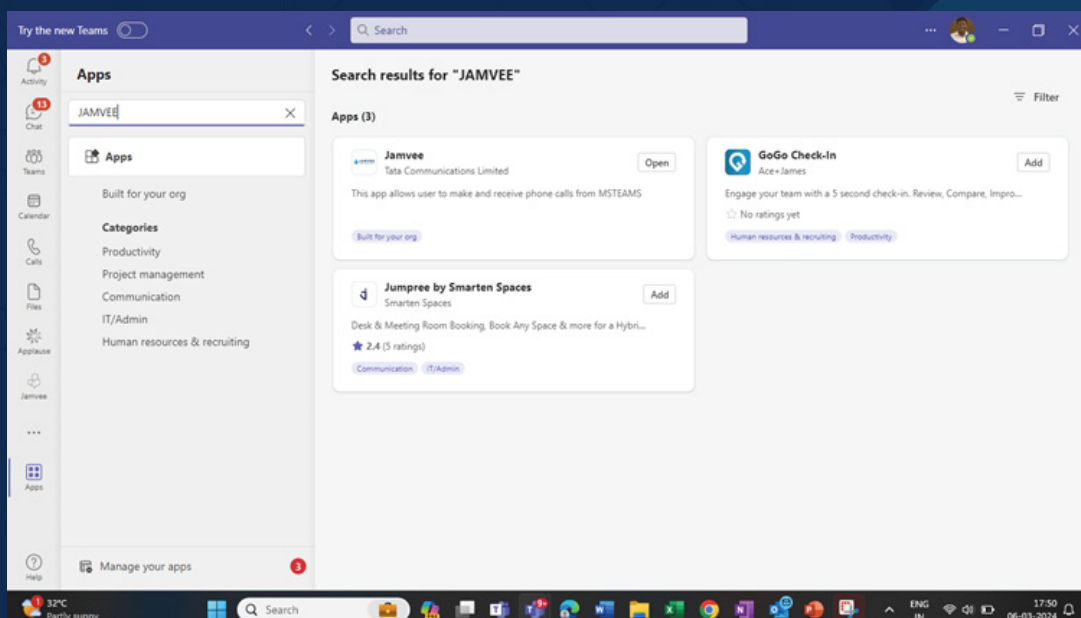

Comprehensive access: Easily access both company and personal contacts, as well as the company contact and address book, all in one place.

Flexible solutions: Jamvee can operate as standalone cloud PBX solution and integrated with Microsoft Teams, Microsoft 365 and Outlook without the need of any specific PSTN calling requirement.

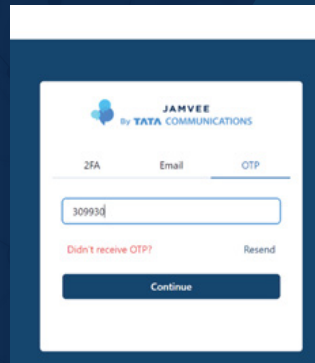

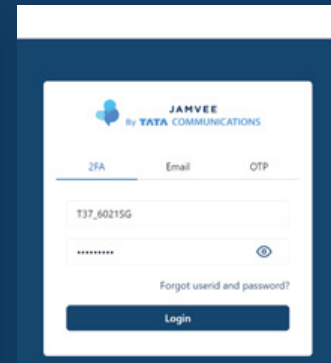

Adding the JAMVEE app in Microsoft Teams:

You can enable JAMVEE with a single click and add it to Microsoft Teams

Enable secure login:

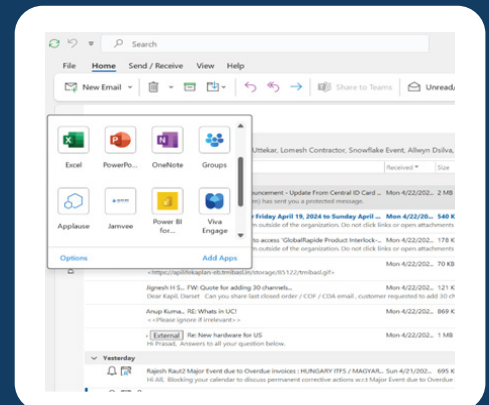

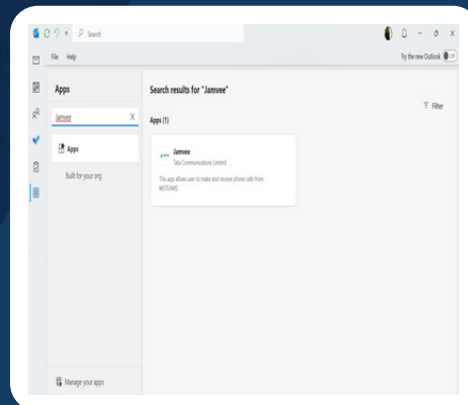

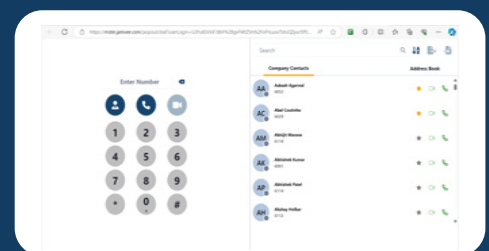

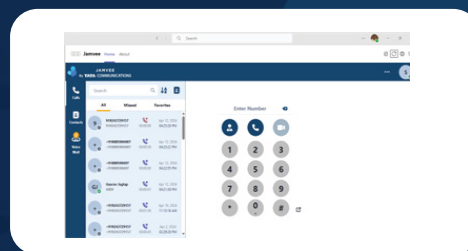

Login via 2-Factor Authentication or Email OTP. The user logs in with a registered email ID and extension. Once the email ID and extension are entered, they are prompted for an OTP.

JAMVEE on Microsoft Teams:

Once the user logs in with either option, they are redirected to the below option, showing two pop outs - the Microsoft Teams pop out and the web pop out.

JAMVEE is also available on Microsoft 365.

JAMVEE for Microsoft Teams and Microsoft 365 desktop offers:

Exceptional user experience:
Make PSTN calls from a CSP app effortlessly.

Flexible solutions:
Standalone and cloud PBX integration with Microsoft Teams and Microsoft 365.

Global support:
Ready to meet evolving needs of enterprises worldwide.
