

# MANAGED SASE SERVICES

## COMPREHENSIVE OFFERING TO MAXIMISE YOUR SASE INVESTMENTS

In today's fast-paced digital landscape, enterprises face increasing challenges in securing and managing complex networks. The rapid shift to remote work, hyper-distributed ecosystems, and IoT adoption have strained legacy infrastructures, exposing vulnerabilities. Many organisations are now turning to Secure Access Service Edge (SASE) to address these issues.

# 40%

Enterprises had **mediocre to bad** experience while there are multiple network providers in the organisation.\*

# 97%

Enterprises **use outside help** for aspects of SASE management. Those few 3% that **self-manage** are still in pilot stages.\*\*

However, SASE adoption is often hindered by the need to integrate diverse environments while maintaining consistent security, compounded by a critical shortage of in-house expertise required to manage and secure your networks, users and private apps.

### CONSEQUENCES OF NOT ENGAGING EXPERTS

Operational inefficiencies

Security vulnerabilities

Migration risks

Operational downtime

### TATA COMMUNICATIONS MANAGED SASE SERVICES PROVIDES THE ANSWER.

Our Managed SASE Services offer a comprehensive suite designed to simplify the end-to-end SASE adoption journey for our customers. Our services are structured into **Core Activities** and modular **Value Added Services Packs (VAS Packs)**, providing unparalleled flexibility and agility. This allows you to tailor your SASE journey to meet specific needs and preferences.

## KEY BENEFITS OF OUR MANAGED SASE SERVICES INCLUDE

### Predictable and error-free deployments:

Proven methodologies, automation and lab validated playbooks for reliable, efficient deployments.

### Consistent performance:

Ensure consistent network behavior and security policies with our standardised approach.

### Intelligent automation:

Streamline operations and reduce errors with AI-powered management platform.

### Best-in-class service:

Rely on standardised best practices and proven expertise for exceptional service delivery.

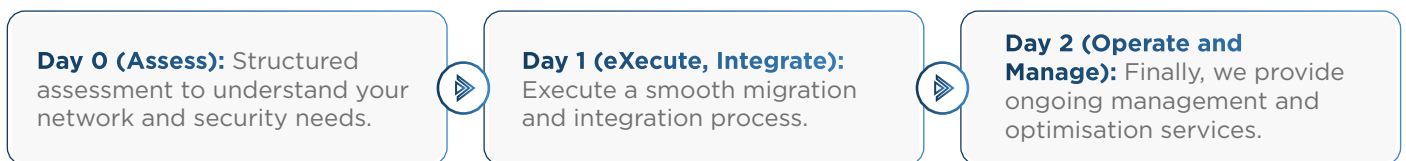

### Real-time validation:

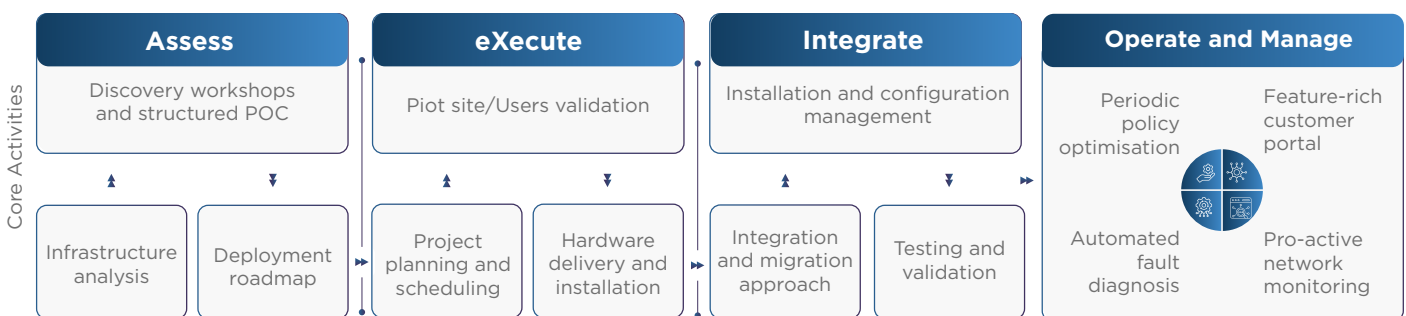

Leverage on-demand labs for testing and validating network configurations and policies.

## AXIOM - OUR MANAGED SERVICES METHODOLOGY FOR DELIVERY AND MANAGEMENT

We have encapsulated our learnings into a tried and tested **AXIOM methodology (Assess, eXecute, Integrate, and Operate and Manage)** for ensuring efficient deployment and lifecycle management of your SASE solutions across:

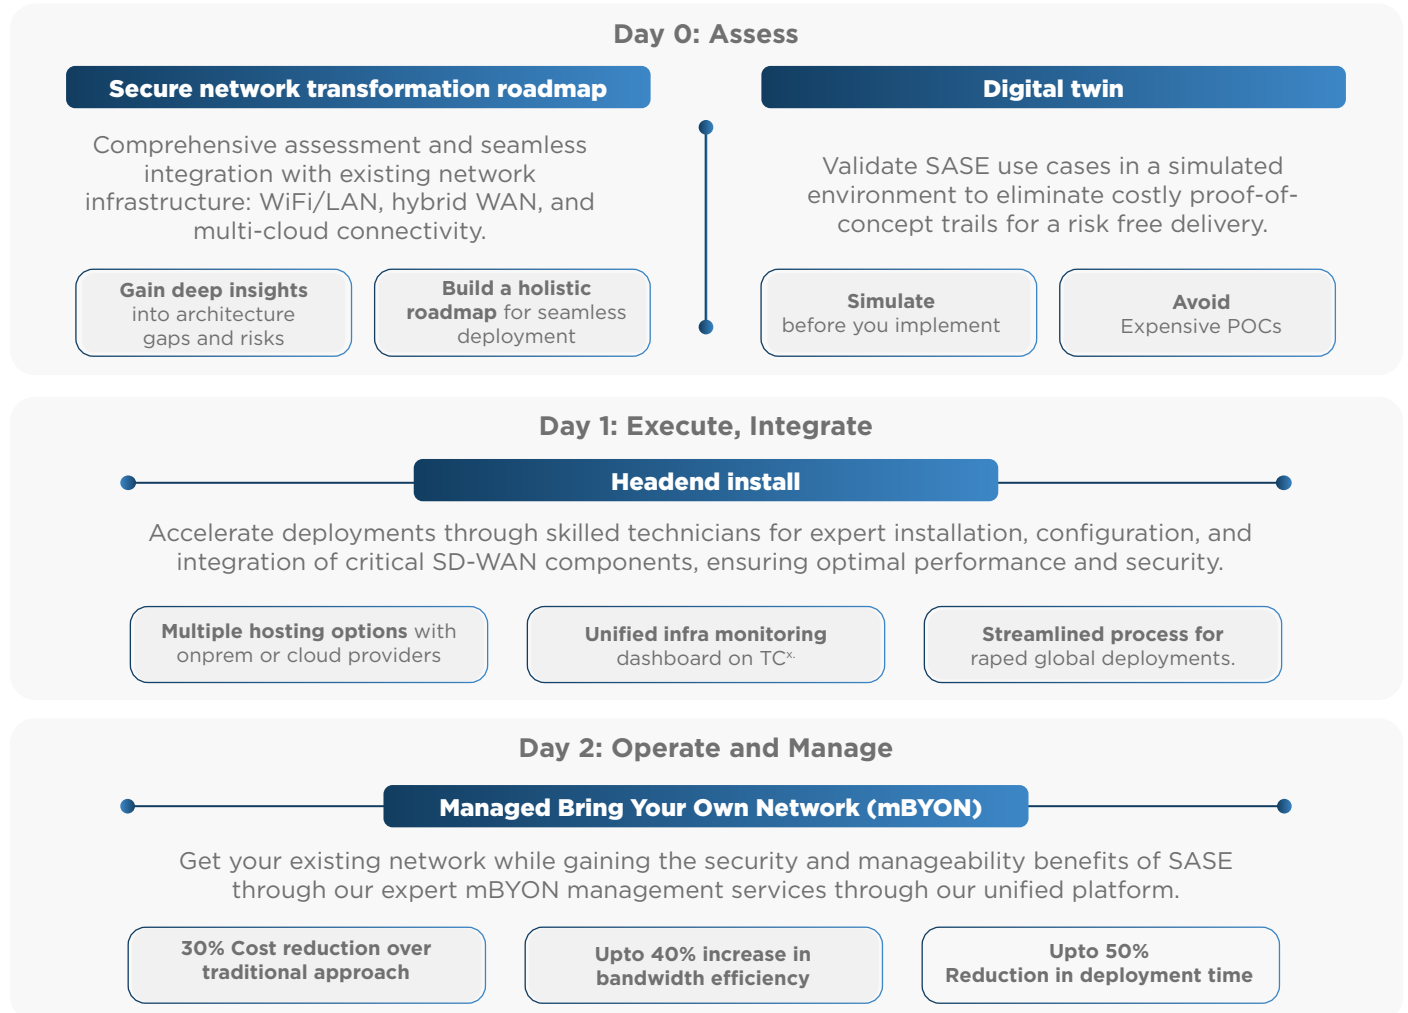

The core activities include essential steps which ensure a seamless SASE transition, optimising network performance, security, and user experience.

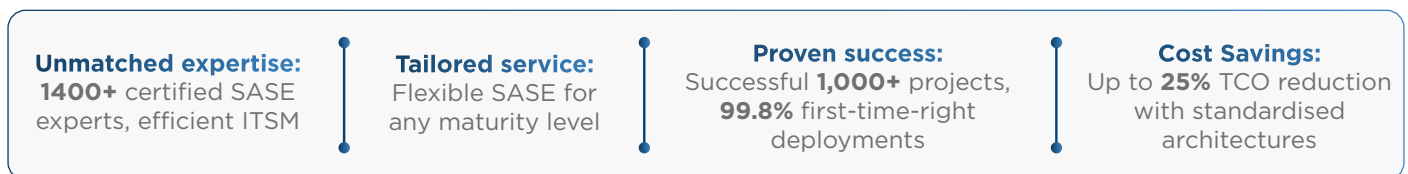

## VALUE ADDED SERVICES PACKS (VAS PACKS)

We offer additional, customisable options beyond the standard core activities that enhance and extend the core SASE offerings.
